# LEGAL SERVICES

Apolat Legal consults the investors in identifying the most efficient legal structure for their business transactions; we assist them in assessing their partners and potential business locations and undertake due diligence on targeted companies or properties. In addition, we draft, review, and give opinions regarding transaction documents, represent investors in negotiating all terms and conditions of such documents, monitor the entire investment process and withdraw investment capital to protect investors from any potential risks. Our experiences allow us to help investors easily adjust their projects, which are typically complicated.

Moreover, Apolat Legal assists investors in planning their financial status from a tax perspective. Tax planning aims to optimally exploit other categories of financial plans by making the best use of tax policies in possible conditions. Making good tax plans will allow other factors of financial plans to interact more effectively and decrease tax burdens. We also assist investors in dealing with any tax-related problem arising from transactions or an enterprise's liabilities toward tax agencies.

## INVESTMENT CONSULTANCY

Since participating in WTO in 2007, Vietnam has relentlessly changed policies and regulations to attract foreign investment sources into the country. However, foreign investors are still under the strict control of state agencies and must perform much more complicated administrative procedures than domestic investors. Moreover, the overlap of regulations causes a lot of difficulties for investors to research and comply with the law.

To improve and enhance the legal system to support investors with a favorable business environment, the Law on Enterprise and Law on Investment issued in 2014 have fixed many defections and created advantageous conditions for foreign investors to operate their businesses in Vietnam. Nowadays, Vietnam is one of the most investment-attractive countries in the world. With deep knowledge of Enterprise and Investment regulations, Apolat Legal has numerous experiences in providing legal services for foreigners investing in Vietnam and for domestic enterprises receiving investment from foreign partners. We have worked on many large projects in different fields and assisted investors not only in one independent procedure but also in an entire project investment process.
